# TP SERIES

## TP Series Promotional Tent

Stand out above the crowd with Celina's TP Series Promotional Tents. An instant eye catcher, the TP Series footprint is approximately 52 ft. (16 meters) in diameter. It is supported by a single 21 ft. (6.5 meter) 3 piece heavy duty aluminum center pole (no side poles necessary), and anchors securely to the ground using six standard 2" box ratchets with foot plates, six stake plates, and 12 - 42" double head stakes. The TP Series was designed using our AutoCAD 3D modeling capabilities with MPanel software for uniform tensioning of the catenary curves on the six sides of this tent. It's contemporary design incorporates six large open arched bays that are ideal for creating promotional areas for vehicle or product displays, or it can be used as an open and inviting shade area for entertaining or informal gatherings. In addition, the TP Series tent can be customized with a company logo, design, or a wide variety of custom digital printing options. (Additional set up and printing charges apply. Call a Celina representative for details.) Sidewalls are not available for TP Series tents.

### TP Series Tops are constructed with:

- ✓ 16 oz. blockout vinyl is standard (14 oz. translucent available upon request).
- ✓ Two color tops are the standard, but additional colors or one solid color is available by special order.
- ✓ One single 21' (3 pc.) heavy duty aluminum center pole.
- ✓ 12 - 42" double headed stakes.
- ✓ Utilizes 6 of our standard 2" box ratchet with foot plates and 6 stake plates.
- ✓ 2" vinyl reinforced webbing runs from each stake to the peak of the tent.
- ✓ All catenary arches are sewn with a 1.25" wide vinyl reinforced webbing.
- ✓ Tent top center pole ring is bolted in place for added support.
