

Crestline Truss Arch Fabric Shelter Series Overview

Celina's Crestline Truss Arch Fabric Shelters are designed for commercial, industrial and agricultural use. Designed using a unique fabric tension system with a galvanized frame and components, the Crestline shelter offers protection from both high winds and snow loads. The Crestline is the perfect solution for additional storage, workshop areas, job sites, carports, and animal protection. The versatile shelters come ready to assemble in a variety of styles including single or double truss systems with arched or vertical sides as well as container shelter set up to provide more storage.
